PROFESSIONAL PROFILE

Software developer with more than 14 years of experience in web development, mobile applications, cloud solutions, and information security. Specialist in AWS, Java, Python, Spring, Oracle, and Android.

EDUCATION

Universidad Autónoma de Guadalajara (UAG) *In progress*
Master's in Cybersecurity

Instituto Tecnológico de Chilpancingo *2007 - 2011*
Computer Systems Engineering

EXPERIENCE

INFOTEC *Sep 2025 – Present*
Professional Services Provider - Software Development

- Analyzed functional and technical requirements of the assigned solution.
- Analyzed the architecture, entity-relationship model, and technology stack of the system.
- Configured the project's development environment with Angular.
- Designed and mocked up user interfaces according to defined standards.
- Developed front-end functionality with Angular.
- Currently analyzing requirements for the SIGER System, using Java and Angular.

Independent Developer *Jan 2023 – Present*
Android Application Developer

- Developed, published, and maintained 15 applications on the Google Play Store.
- Implemented MVVM architecture with Jetpack Compose, Firebase, and REST APIs.
- Migrated existing applications to Jetpack Compose and updated to Android SDK 36/37.
- Automated Play Console listing publication with Python and the Google Play Developer API.
- Internationalized the applications into 12 languages and implemented dark mode.
- Developed Privacy Policy Generator, with dynamic generation per CCPA/CPRA, GDPR, CalOPPA, and COPPA.

Instituto Nacional Electoral (INE) *Sep 2025 – Feb 2026*
Specialist Professional in Systems Development

- Developed microservices with Quarkus and Java 21 following hexagonal architecture.
- Developed the digital signature service for PDF documents using PKCS12 certificates.
- Integrated digital signature validation through an external SOAP service.
- Implemented gRPC communication between microservices, as both server and client.
- Developed JWT-based authentication and authorization, including login, refresh, and logout.
- Implemented data persistence with PostgreSQL using Hibernate/Panache.

Global Hitss (Afirme) *Jan 2025 – Sep 2025*
Systems Engineer

- Developed microservices and RESTful APIs with Spring Boot for banking systems.
- Designed and developed interfaces with React and Material UI.
- Migrated the SPEI reconciliation logic from C# to Java with Spring Boot.
- Designed the database for a new SPEI Reconciliation tool from scratch.

- Developed the reconciliation file processing service with integrity validation.
- Developed REST endpoints and report generation in Excel, CSV, and TXT.

Instituto Nacional Electoral (INE)

Jan 2024 – Dec 2024

Cloud Application Development Professional

- Developed Python and Java lambdas for digital signature, certificate validation, and file handling on AWS.
- Configured AWS services such as API Gateway, Lambda, Cognito, S3, DynamoDB, and CloudFormation.
- Automated infrastructure deployment as code with AWS CloudFormation.
- Performed application security analysis with Checkmarx SCA and Veracode.
- Developed front-end coding for the assigned modules.

SKILLS

Amazon AWS: CloudFront, CloudFormation, S3, IAM, EC2, RDS, DynamoDB, Lambda, API Gateway, CloudWatch, Cognito, EventBridge, CLI, SAM, SQS, SNS, Step Functions, Secrets Manager, Certificate Manager, VPC, SES

Google Services: Google Analytics, Google Analytics for Firebase, Google Play Console, Google AdMob, Google Geocoding

Programming Languages: Java EE (8, 11, 17, 21), JavaScript, Python, PHP, Visual Basic .Net, C++, C#, Kotlin, Java for Android

AI Tools: Claude, ChatGPT, Gemini, Copilot, DeepSeek, Cursor, Gamma

Spring: Spring MVC, Spring REST, Spring Boot, Spring Batch, Spring Web Flow, Spring Security

Frameworks, Technologies and Libraries: Swagger, Hibernate, React.js, Quarkus, Qute, Redux, Ant Design, Material UI, Jetpack, Firebase, Ajax, JQuery, Struts, JSF, JSP, PrimeFaces Ultima

Authentication and Authorization: OAuth2, JWT, Spring Security, AWS Cognito, LDAP

Build Tools: Maven, Gradle, Groovy, npm, Yarn, Ant

Task Scheduling: Quartz, EventBridge, Cron

Unit, Load and Automated Testing: Selenium, JUnit, Mockito, JMeter, Webload

REST and SOAP Service Testing: Postman, Insomnia, Boomerang, SoapUI

Code Analysis and Security: SonarQube, Checkmarx (SAST, SCA), Veracode, OWASP ZAP, Dependency-Check

Automation, Scripting and Web Scraping: JavaScript (DOM), Java, Python

Development Techniques and Patterns: DAO, OOP, MVC, Singleton, Hexagonal Architecture, Factory, MVP, MVVM

Databases: Oracle (11g, 12c, 19c), PostgreSQL, SQLite, DynamoDB, MySQL, SQL Server, MS Access, MariaDB

Application Servers: JBoss EAP (6, 7), WildFly 8, Apache Tomcat, WebSphere

Business Intelligence: Power BI

Repositories: SVN Tortoise, Git, GitHub, GitLab, Bitbucket, Sourcetree

Diagramming and Modeling: ArgoUML, Bizagi, Lucidchart, Visio, Cloudcraft, Mermaid

Containerization and Virtualization: Docker, Kubernetes

Service Communication: gRPC (client and server)

Cryptography / Digital Signature: PKCS12, PKCS7, SeguriSign, Crypto (Java/JS/Python)

Other Technologies: PHP (Laravel, Symfony, CodeIgniter, CakePHP), GeneXus, Visual Basic .Net, WebFocus Developer Studio, OLEDB, MongoDB, Richfaces

CERTIFICATIONS

[Oracle Java Learning Path \(Oracle \(INFOTEC\), Jul 2026\)](#)

[Go to AWS Certification - Developer Associate - Latam \(Fast Lane LATAM, Jun 2023\)](#)

[Basic Kotlin for Android Course: Fundamentals from 0 to 100 \(Udemy, Apr 2024\)](#)

[Oracle Basics from Scratch \(SQL and PL/SQL\) \(Udemy, Aug 2025\)](#)

[Cryptography \(Theory and Practice\) \(Udemy, Sep 2025\)](#)
